

Welcome

SENSO TELECOM installs and operates a turnkey solution for switchless telecom operators, who face the need for innovative VoIP services, securely deployed to their customers.

Based on our powerful hosted platform, our customers can market, deliver and control their specific VoIP services, quickly, with low investment and no telecom expertise. Auto-admin by the user himself makes the system very cost effective.

SENSO TELECOM provides a wide array of complete, diversified and complementary VoIP services. Our permanent innovation helps you catch always more customers, with always higher margins and higher.

SENSO TELECOM provides solutions and services for fixed and mobile networks.

Our features include self-provisioning of local or non geographical phone numbers, virtual PBX, voice mail, customized calling plans and rates, online payment, multi criteria call hunting service, automatic invoicing with prepay or postpay options.

The proven telecom expertise and professionalism of our team is your guarantee for a high level quality of service and success for your future deployments.
